

EAMENA-CPF training software requirements

Essential

- ❖ Google Earth Pro
Free to download from: <https://www.google.co.uk/earth/download/gep/agree.html>

- ❖ An internet browser for running the database.
The database works in any browser, but we recommend using Chrome.
Free to download from: <https://www.google.co.uk/chrome/>

- ❖ QGIS
Free to download from: <https://www.qgis.org/en/site/forusers/download.html>
We recommend downloading the stable version, so not the very latest release.

- ❖ 'Office' programmes, for text processing, spreadsheets, and slideshows. Choose at least one from the list below:
 - Open Office
Free to download from <http://www.openoffice.org/download/index.html>
 - Google Docs
Free to access at <https://docs.google.com>
It is free, but you need a Google account.
 - Microsoft Office
The desktop programmes are paid for, but it can be used on the web for free:
<https://www.microsoft.com/en-gb/microsoft-365/free-office-online-for-the-web>
It is necessary to register.

Optional / for some training programmes only

- ❖ Zoom
Essential for the online training programmes.
Free to download from https://zoom.us/download#client_4meeting
You will get the most out of the meetings if you install the app on your laptop and log in using your Facebook or Google account, or register separately for a Zoom account at <https://zoom.us/signup>

- ❖ Garmin Basecamp
This is useful for transferring coordinates from and to your GPS, setting out routes, etc.
<https://www.garmin.com/en-GB/software/basecamp/>

Prior to the training, please register for access to:

- ❖ Earth Explorer

To access imagery, for example Corona imagery.

<https://earthexplorer.usgs.gov/>

❖ Google Earth Engine

For general information see <https://earthengine.google.com/>

To register: <https://signup.earthengine.google.com/>
